

Our Innovations

Advanced Board Architecture

Designed for effortless lift-off and planing, our boards feature anti-dive hull properties and an integrated mast foot that minimizes resistance during touchdowns.

Custom Hydrofoil Geometry

Meticulously crafted and validated through CFD simulations, our hydrofoils feature custom geometry that improves efficiency and stability. Furthermore, our integrated 8 kW Direct Drive motor provides instant torque response, silent running, and improves handling.

Smart Battery Technology

Our batteries are among the largest and use premium battery cells borrowed from german automotive manufacturers. Our smart Battery Management System ensures the highest level of performance and safety, and allows for market-leading cloud-based status monitoring.

Seamless Connectivity

Our eFoils are equipped with a WiFi modem and a SIM card to ensure seamless communication between our servers and your boards. A GPS and an array of sensors collect telemetry data, which riders can view through the SiFly Apps after each session.

Commercial Software

The SiFly Apps provide cloud-based monitoring that enables business owners to manage their lucrative assets effectively. Track telemetry, download updates, time sessions, enforce power limits, place geofences, and set speed limits from anywhere.

2024

Stellar Series

Stellar R
The sweet-spot of electric hydrofoils.

Size **171 cm** | Volume **120 l.** | Skill level **Intermediate**

Proudly standing at the pinnacle of our line-up, the Stellar Series promises an unrivalled fusion of innovation, precision, and sheer excitement. Boasting a full carbon construction, improved board architecture, lower swing weight, and a stunning new design, the Stellar R and S are a showcase of engineering, innovation, and elegance.

Rider Series

Rider +
A safe and comfortable cruiser.

Size **171 cm** | Volume **130 l.** | Skill level **Beginner**

The Rider Series are our entry-level eFoils. With a lower price and a shock-absorbing, closed-cell foam deck, these boards showcase not only impressive durability, but also exceptional safety and forgiveness. Nevertheless, they remain responsive and agile, which makes the Rider + and Rider an ideal choice for enthusiasts and watersports centers looking for both value and excitement.

Stellar S
The ultimate carving machine.

Size **161 cm** | Volume **98 l.** | Skill level **Advanced**

Adventure Series

SiFly E
A lucrative business asset.

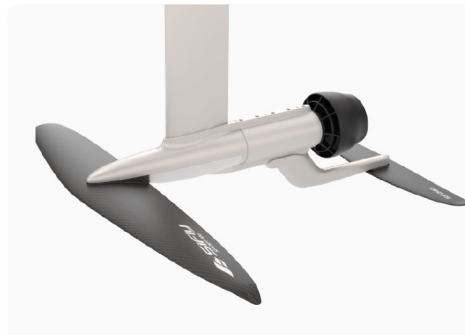

Size **190 cm** | Volume **170 l.** | Skill level **Beginner**

The Adventure Series accommodates all skill levels, ages, and weights, riders ready to embark on an unforgettable eFoil journey. Offering options like the SiFly E — the largest and most stable board on the market, and the SiFly Lite — our most compact, inflatable board, these eFoils are ready for any adventure. Available in a variety of vibrant colors, you'll draw a crowd anywhere you go.

Hydrofoil V3

Jet
Ultra safe. Ultra smooth.

Height **75 cm** | Compatibility **Stellar & Rider Series**

The Hydrofoil V3 is our most versatile unit yet, boasting interchangeable drive options. The Jet Drive ensures maximum safety and a silky smooth ride, while the Prop Drive delivers jaw-dropping performance and agility. With an adjustable rear stabilizer and the option to add a beginner-friendly auxiliary stabilizer, the Hydrofoil V3 is the most advanced propulsion system on the market.

SiFly Lite
Inflatable. Practical. Fun.

Size **200 cm** | Volume **170 l.** | Skill level **Beginner**

DragonFly

DragonFly V1
Control is in your hands.

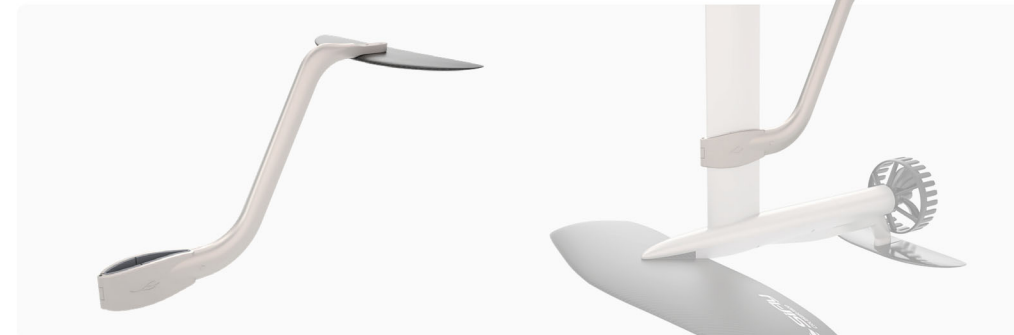

Compatibility **SiFly E**

The DragonFly is designed to give beginners more control over their eFoil. The removable handlebar substantially enhances the rider's balance and stability. The SiFly Remote Controller integrates into the handlebar seamlessly, while the thumb throttle built into it puts the power at your fingertip. Accelerate and slow down with the ease of an electric scooter.

EZ GO

EZ GO
eFoiling made easy.

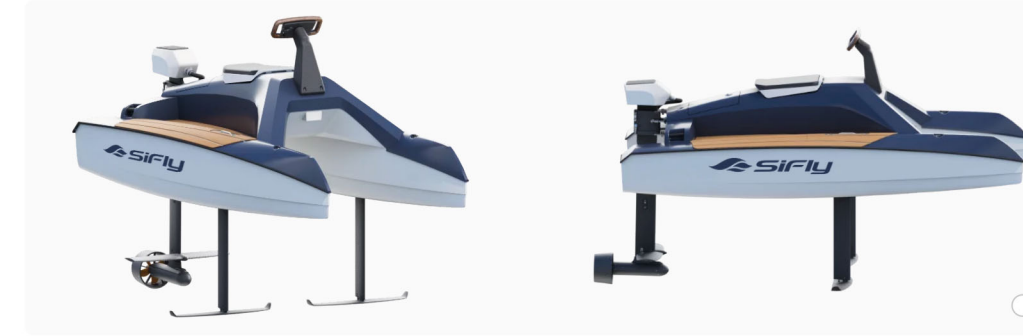

Compatibility **Hydrofoil V1, V2, V3**

To make the sport even more accessible, we developed the EZ GO stabilizer. This patented auxiliary unit attaches onto the mast and prevents beginners from flying too high and breaching the water surface with the fuselage and wings, which oftentimes results in a fall. Learning to eFoil has never been easier.

Overboat

100-F
Fly high, stay dry.

Length **334 cm** | Weight **150 cm** | Top Speed **28 km/h** | Battery **5.7 kWh** | Ride Time **2 hours** | Skill Level **-**

The Overboat is an electric catamaran that defies the traditional boating experience. Equipped with an electric propulsion system and multiple hydrofoils, it glides over the water, generating zero emissions, noise and wake. On the Overboat, anyone can easily and safely experience the unique sensation of flying over the waves.
